Welcome to my blog

darknmt

August 16, 2017

Contents

- Sheaves and Cohomology

- Berger classification and remarks on parallel structures

- Moser's Isotopy method and Darboux theorem

- Bogomolov-Beauville classification

- From Busemann function to Cheeger-Gromoll splitting

- Calabi-Yau theorem

- Symmetric spaces and Lie groups

- De Rham decomposition

- Well-known results in Geometry

- Prelude to Riemannian geomeotry

- Classification theorem in Riemannian geometry
